

Bontrager
2017 Buying Guide

BONTRAGER

Why Bontrager?

It's a question worth asking.

In today's marketplace, it's not enough to just stock the latest 5-star product or be the exclusive retailer for some obscure buzz-worthy brand. Today's customer expects products to inspire their adventure, to elevate their ride and increase their performance. And they expect it to be delivered exactly how and when they want it.

That's where we come in.

No other brand offers the same level of consistent product experience. From order fulfilment to out-of-the-box customer set-up, our products and services are defined by your needs, developed through professional athlete feedback and refined through years of industry knowledge and experience.

At Bontrager, we want to help ensure that your shop is a resource that your local riding community can rely on, day in and day out. And when we do that, we all win together.

The best in fit, fashion, and function

Bontrager bike helmets look great, fit great and are hassle-free to set up. No matter what kind of rider you are, you shouldn’t have to sacrifice comfort and style in order to be safe.

Technology Glossary

Helmets

Front center channel -
Distinct vent shape draws in significantly more air for increased cooling and all-day comfort

Micro-Manager II -
Intuitive one-handed fit system accommodates a wide range of head size

In-mold composite skeleton -
Increases structural integrity and allows a greater variation of vent shape and size

AgION fit pads -
Moisture wicking antimicrobial pads eliminate odours completely and naturally

FormFit -
Flexible head-conforming brow band has a tailored feel that also improves ventilation

FlatLock II -
Helmet strap management made simpler and more comfortable with a fixed position for streamlined fit

Headmaster II -
Intuitive one-handed fit system adjustable by height and circumference with premier look and feel

Blendr -
Integrates select accessories without bulky mounting hardware for a simple, clean setup

MagLock -
Visor locks into place magnetically for secure, seamless integration

Helmets

Velocis Road Helmet

Our fastest, lightest and most innovative helmet ever.

AgION FIT PADS · FRONT CENTER CHANNEL · INTERNAL CHANNELING · HEADMASTER II FIT SYSTEM · IN-MOLD COMPOSITE SKELETON

- The in-mould composite skeleton increases helmet integrity and larger vent variations
- The Headmaster II fit system allows easy one-handed height and circumference adjustments
- The flexible head-conforming FormFit brow band improves comfort and ventilation
- AgION antimicrobial pads wick moisture away and completely eliminate odours naturally
- LockDown dividers make helmet strap management look clean, and are simple to adjust
- Internal, recessed channels manage airflow through the helmet and over the head
- The design allows for compatibility and easy installation of the Bontrager NeoVisor
- The Crash Replacement Guarantee provides a free helmet replacement if involved in a crash within the first year of ownership

What is MIPS?

MIPS stands for “Multi-directional Impact Protection System”. Created through years of research, the combination of the brain’s own protection and MIPS can provide better protection from angled impacts.

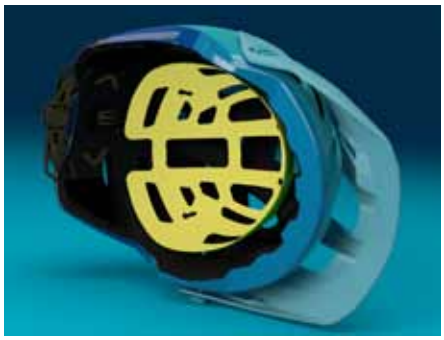

Mimicking the brain

MIPS imitates the brain’s way of protecting itself by giving the helmet its own low-friction layer between the outer shell and the liner.

Low-friction layer

In a MIPS helmet, the shell and the liner are separated by a low-friction layer, allowing the helmet to slide relative to the head during an angled impact.

Angled impact

Conventional helmets are tested by being dropped vertically onto a flat surface. MIPS helmets are designed to deal with how some accidents may occur, with angled impacts to the head.

1-year Crash Replacement Policy

A helmet that has been impacted in a crash should be replaced, even if there is no visible damage, because any damage to the helmet will reduce the protection the helmet offers.

If a consumer purchased a Bontrager helmet and is involved in a crash within the first year of ownership, Bontrager will replace it at no charge. To qualify under this policy, prepare the damaged helmet along with the sales receipt and a description of the incident. Then contact your sales representative, who will direct your shipment to the nearest Trek office.

CRASH REPLACEMENT GUARANTEE

Ballista MIPS Road Helmet New

The ultimate aero road lid with wind tunnel-proven design and the added protection of MIPS.

AgION FIT PADS · FRONT CENTER CHANNEL · HEADMASTER II FIT SYSTEM · MIPS

The shoe fits. Wear it.

Built around our exclusive inForm lasts, Bontrager cycling shoes are designed to be the best fitting, most comfortable shoes on the market. High-performance outsoles provide superior energy transfer and efficiency, while our inForm patterned uppers provide a fine-tuned fit, regardless of foot volume or width.

Technology Glossary

Footwear

inForm Pro last -
High-performance toe spring with a secure fit for ultimate efficiency

inForm Race last -
High-performance toe spring with a slightly roomier fit from the ball to the mid-foot

inForm Performance last -
Relaxed fit with a flatter foot position for more versatility and utility

inForm Tundra last -
High performance fit optimised for riding with thicker socks in cold weather

Platinum Series carbon sole -
Our lightest and stiffest sole possible, built from 100% hand-moulded carbon fibre

Gold Series carbon sole -
Hand-moulded, 100% carbon for incredible stiffness, lightweight and efficient power transfer

Silver Series carbon sole -
Carbon fibre / glass composite sole balances stiffness and efficiency with affordability

Bronze Series composite sole -
Nylon composite sole is tuned for comfort and efficiency

PowerTruss sole -
Structural sole design dramatically improves stiffness without adding significant weight

GnarGuard -
Outer protection against trail brush and debris for increased durability

Lightning Mesh -
TPU-coated mesh upper material that's lightweight, breathable and extremely supple

Feel better.
Perform better.

Proper foot support is essential for optimum pedalling comfort, power and endurance. Bontrager's all-new inForm BioDynamic insoles are carefully engineered to provide the advanced foot support that riders need in order to maximise their on-bike performance and comfort.

Inform BioDynamic Footbeds

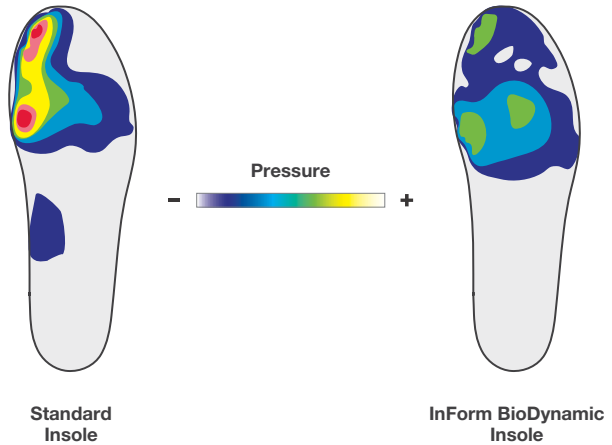

1. Dual-density construction:
   a. EVA foam adapts to the shape of the foot for improved comfort
   b. The nylon heel cradle enhances insole stability and provides durable support to the arch and heel
2. A low-friction top sheet for blister-free performance
3. The proprietary 3D Arch provides complete foot support
4. The deeply sculpted heel pocket captures, aligns and stabilises the heel

BONTRAGER
with SUPERfeet

inForm BioDynamic insoles vs non-inForm BioDynamic insoles

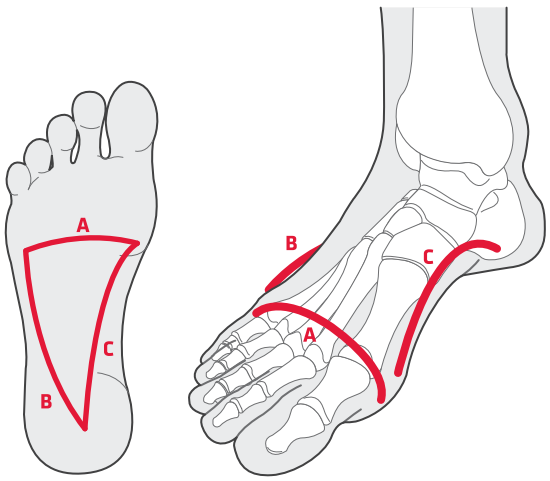

inForm BioDynamic insoles improve comfort and stability by evenly distributing pressure across the forefoot and toes.

Proprietary 3D Arch

The key to Bontrager's advanced foot support is our proprietary 3D Arch, which has been painstakingly engineered to support all three arches of the foot. Taking into account not just the medial or longitudinal arch, but also the transverse and lateral arches, our 3D Arch's unparalleled level of support helps to align and stabilise the foot, for more even pressure distribution and maximum energy transfer.

A Transverse Arch
B Lateral Arch
C Medial Arch

Getting a proper fit

inForm Biodynamic insoles are available in three distinct arch profiles to provide optimal fit. The Bontrager arch sizer is an easy-to-use tool that allows you to quickly determine the proper arch profile. Steps for a proper fit:

1. Place the arch sizer under bare feet with the heels against the heel cups
2. Place the heels against the heel cups
3. Wait 10 seconds for the thermochromatic material to activate
4. Remove the feet and compare the impression against the arch legend
5. Select the corresponding numbered/coloured insole based on the footprint most similar to the legend.

inForm BioDynamic Footbeds New

Step into advanced biomechanical foot control that maximises pedalling efficiency and riding comfort

- Engineered for unparalleled foot control, pedalling efficiency and comfort
- The 3D Arch Pillar provides optimal arch support for improved knee alignment
- The precision-moulded heel cup helps to stabilise and align the foot
- A footrest metatarsal pad helps to reduce or eliminate hot foot
- inForm BioDynamics – Optimises natural movement for sustained, higher performance

Precision. Crafted.

Next to the bike frame itself, nothing has a bigger impact on your bike's performance than your wheels. From rugged training wheels to featherweight racing wheels, upgrading to a set of Bontrager bike wheels is a certain way to save weight, go faster and improve your bike's handling.

Technology Glossary

Wheels

OCLV Carbon -
The most advanced carbon available is ultra-light, compliant and durable

Interchangeable axles -
Interchangeable axles allow for compatibility with more frames and forks

D3 Dual Directional Design -
Super aero rim profile produces lower drag results at the tyre-leading and rim-leading edge

Stacked Lacing -
Provides a better spoke bracing angle for a stiffer wheel

OSB -
Reduces wheel dish, improving stiffness and stability

Rapid Drive -
Fast engagement hub design instantly transfers effort into forward momentum

TLR -
TLR rims allow for quick transition from traditional tubed tyres to tubeless systems

Reinforced Spoke Nodes -
Rim design features localised material reinforcement at the spoke node

Wheels

Aeolus XXX Tubular Road Wheel New

A smooth rolling, stiff and confidence-inspiring wheel that takes lightweight to the next level.

OPTIMUM COMPACTION LOW VOID

STACKED LACING

- The OCLV is ultra-light, compliant and durable: the most advanced carbon available
- Stacked lacing alignment provides a better spoke bracing angle for a stiffer wheel
- OCLV Carbon tubular rim, 21mm outer rim width
- DT Swiss-based hubs with a 36-tooth star ratchet and SL driver body
- DT Swiss Aerolite spokes and Alpina alloy locking hex-head nipples
- Compatible with Shimano 10/11spd, SRAM 10/11 freehubs
- Includes Bontrager Carbon Stop Cork pads and quick release
- No rider weight restrictions

Part #	Size	FT/RR	Type	Colour	Speed (Axle)	Hub OLD	Holes	Butting	Weight
538694	700c	Front	Tubular	Black		100mm	18	14/17/14	420g
538695	700c	Rear	Tubular	Black	10/11	130mm	24	14/17/14	556g

Aeolus 9 D3 Tubular

An ultra-aero 90mm tubular road wheel considered the fastest non-disc wheel on the market.

DUAL DIRECTIONAL DESIGN

OPTIMUM COMPACTION LOW VOID

STACKED LACING

- The D3 Dual Directional Design profile cuts drag at the tyre-leading and rim-leading edges
- OCLV is ultra-light, compliant and durable
- Stacked lacing alignment provides a better spoke bracing angle for a stiffer wheel
- 90mm deep OCLV Carbon rim construction (27mm outer, 17.5mm inner width)
- Compatible with Shimano 10/11 speed, SRAM 10/11, Campagnolo (freehub sold separately)
- Includes Bontrager Carbon Stop Cork pads, valve extender and quick release
- No rider weight restrictions

Part #	Size	FT/RR	Type	Colour	Speed (Axle)	Hub OLD	Holes	Butting	Weight
505022	700c	Front	Tubular	Black		100mm	18	14/17/14	744g
505018	700c	Rear	Tubular	Black	10/11	130mm	24	14/17/14	862g

Aeolus 9 TLR D3 Clincher

DUAL DIRECTIONAL DESIGN · OPTIMUM COMPACTION LOW VOID · STACKED LACING · TUBELESS READY

A lightweight, 90mm-depth carbon TLR wheel that delivers top speed, performance and control.

- The D3 Dual Directional Design profile cuts drag at the tyre-leading and rim-leading edges
- OCLV is ultra-light, compliant and durable
- Tubeless Ready (TLR) rims allow for quick transition to a tubeless system
- Stacked lacing alignment provides a better spoke bracing angle for a stiffer wheel
- OCLV Carbon rim (27mm outer, 19.5mm inner width) and DT Swiss hub
- Compatible with Shimano 10/11 speed, SRAM 10/11, Campagnolo (freehub sold separately)
- Includes Carbon Stop cork pads, TLR rim strip, TLR valve stem and quick-release skewer

Part #	Size	FT/RR	Type	Colour	Speed (Axle)	Hub OLD	Holes	Butting	Weight
506706	700c	Front	TLR/Clincher	Black		100mm	18	14/17/14	840g
506707	700c	Rear	TLR/Clincher	Black	10/11	130mm	24	14/17/14	972g

Aeolus 7 D3 Tubular

DUAL DIRECTIONAL DESIGN · OPTIMUM COMPACTION LOW VOID · STACKED LACING

A wind-cheating 70mm carbon fibre tubular road wheel built for time trials and triathlons.

- The D3 Dual Directional Design profile cuts drag at the tyre-leading and rim-leading edges
- OCLV is ultra-light, compliant and durable
- Stacked lacing alignment provides a better spoke bracing angle for a stiffer wheel
- 70mm deep OCLV Carbon rim construction (27mm outer, 17.5mm inner width)
- Compatible with Shimano 10/11 speed, SRAM 10/11, Campagnolo (freehub sold separately)
- Includes Bontrager Carbon Stop Cork pads, valve extender and quick release
- No rider weight restrictions

Part #	Size	FT/RR	Type	Colour	Speed (Axle)	Hub OLD	Holes	Butting	Weight
505021	700c	Front	Tubular	Black		100mm	18	14/17/14	690g
505017	700c	Rear	Tubular	Black	10/11	130mm	24	14/17/14	828g

Aeolus 7 TLR D3 Clincher

DUAL DIRECTIONAL DESIGN · OPTIMUM COMPACTION LOW VOID · STACKED LACING · TUBELESS READY

A lightweight, 70mm depth carbon TLR wheel that delivers top speed, performance and control.

- The D3 Dual Directional Design profile cuts drag at the tyre-leading and rim-leading edges
- OCLV is ultra-light, compliant and durable
- Tubeless Ready (TLR) rims allow for quick transition to a tubeless system
- Stacked lacing alignment provides a better spoke bracing angle for a stiffer wheel
- OCLV Carbon rim (27mm outer, 19.5mm inner width) and DT Swiss hub
- Compatible with Shimano 10/11 speed, SRAM 10/11, Campagnolo (freehub sold separately)
- Includes Carbon Stop cork pads, TLR rim strip, TLR valve stem and quick-release skewer

Part #	Size	FT/RR	Type	Colour	Speed (Axle)	Hub OLD	Holes	Butting	Weight
506704	700c	Front	TLR/Clincher	Black		100mm	18	14/17/14	738g
506705	700c	Rear	TLR/Clincher	Black	10/11	130mm	24	14/17/14	872g

Aeolus 5 D3 Tubular

DUAL DIRECTIONAL DESIGN · OPTIMUM COMPACTION LOW VOID · STACKED LACING

A versatile and durable 50mm carbon fibre tubular road wheel built for all-round performance.

- The D3 Dual Directional Design profile cuts drag at the tyre-leading and rim-leading edges
- OCLV is ultra-light, compliant and durable
- Stacked lacing alignment provides a better spoke bracing angle for a stiffer wheel
- 50mm deep OCLV Carbon rim construction (27mm outer, 17.5mm inner width)
- Compatible with Shimano 10/11 speed, SRAM 10/11, Campagnolo (freehub sold separately)
- Includes Bontrager Carbon Stop Cork pads, valve extender and quick release
- No rider weight restrictions

Part #	Size	FT/RR	Type	Colour	Speed (Axle)	Hub OLD	Holes	Butting	Weight
505020	700c	Front	Tubular	Black		100mm	18	14/17/14	550g

Aeolus 5 TLR D3 Clincher

DUAL DIRECTIONAL DESIGN · OPTIMUM COMPACTION LOW VOID · STACKED LACING · TUBELESS READY

A lightweight, 50mm depth carbon TLR wheel that delivers top speed, performance and control.

- The D3 Dual Directional Design profile cuts drag at the tyre-leading and rim-leading edges
- OCLV is ultra-light, compliant and durable
- Tubeless Ready (TLR) rims allow for quick transition to a tubeless system
- Stacked lacing alignment provides a better spoke bracing angle
- OCLV Carbon rim (27mm outer, 19.5mm inner width) and DT Swiss hub
- Compatible with Shimano 10/11 speed, SRAM 10/11, Campagnolo (freehub sold separately)
- Includes Carbon Stop cork pads, TLR rim strip, TLR valve stem and quick-release skewer

Part #	Size	FT/RR	Type	Colour	Speed (Axle)	Hub OLD	Holes	Butting	Weight
506702	700c	Front	TLR/Clincher	Black		100mm	18	14/17/14	650g
506703	700c	Rear	TLR/Clincher	Black	10/11	130mm	24	14/17/14	790g

Aeolus 5 Disc D3 Tubular

DUAL DIRECTIONAL DESIGN · INTERCHANGEABLE AXLES · OPTIMUM COMPACTION LOW VOID · STACKED LACING

A carbon tubular disc wheel that delivers top speed, performance, durability and control.

- The D3 Dual Directional Design profile cuts drag at the tyre-leading and rim-leading edges
- OCLV is ultra-light, compliant and durable
- Center Lock disc hubs with interchangeable axles increase compatibility
- Stacked lacing alignment provides a better spoke bracing angle
- OCLV Carbon rim (27mm outer, 19.5mm inner width) and DT Swiss hub
- Compatible with Shimano 10/11 speed, SRAM 10/11 freehubs
- Includes end caps, 12/15mm front, 5/12mm rear
- No rider weight restrictions

Part #	Size	FT/RR	Type	Colour	Speed (Axle)	Hub OLD	Holes	Butting	Weight
509973	700c	Front	Tubular	Black		100mm	24	14/17/14	580g
509974	700c	Rear	Tubular	Black	10/11	135/142mm	24	14/17/14	715g

Aeolus 5 TLR Disc D3 Clincher

A 50mm depth TLR disc brake wheel that delivers top speed, performance, durability and control.

DUAL DIRECTIONAL DESIGN

Aura 5 TLR

A Tubeless Ready road wheel that mates a carbon fairing and slippery aero profile to a classic aluminium brake track rim.

ALUMINUM CARBON CONSTRUCTION
STACKED LACING
TUBELESS READY

- ACC rim construction mixes lightweight aluminium and resilient carbon fibre
- Stacked lacing alignment provides a better spoke bracing angle for a stiffer wheel
- Tubeless Ready (TLR) rims allow for quick transition to a tubeless system
- Aluminium with carbon rim construction (23mm outer, 17.5mm inner width)
- Compatible with Shimano 10/11 speed, SRAM 10/11, Campagnolo
- Includes a Bontrager TLR rim strip, TLR valve stem and internal cam quick release
- No rider weight restrictions

Paradigm Elite TLR

OFFSET SPOKE BED STACKED LACING TUBELESS READY

Tubeless Ready alloy wheels that deliver pro-level performance without the pro-level price tag.

- Stacked Lacing provides a better spoke bracing angle for a stiffer wheel
- Tubeless Ready (TLR) rims allow for quick transition to a tubeless system
- The offset spoke bed reduces wheel dish for a stiff and stable performance
- 6061 alloy rim 25mm outer, 19.5mm inner width, DT Swiss hubs
- Shimano 10/11, SRAM 10/11, Campagnolo (freehub sold separately)
- Includes a Tubeless Ready (TLR) rim strip, TLR valve stem and internal cam quick release
- No rider weight restrictions

Part #	Size	FT/RR	Type	Colour	Speed (Axle)	Hub OLD	Holes	Butting	Weight
523244	700c	Front	TLR/Clincher	Black		100mm	18	14/17/14	642g
523245	700c	Rear	TLR/Clincher	Black	11	130mm	24	14/17/14	822g

Paradigm Comp TLR New

OFFSET SPOKE BED STACKED LACING TUBELESS READY

Tubeless Ready alloy wheels that deliver pro-level performance without the pro-level price tag.

- Stacked Lacing - Provides a better spoke bracing angle for a stiffer wheel
- Tubeless Ready (TLR) rims allow for quick transition to a tubeless system upgrade
- The offset spoke bed reduces wheel dish for a stiff and stable performance
- 6061 alloy rim 23mm outer, 19.5mm inner width, DT 240 with 18 tooth engagement
- Shimano 10/11, SRAM 10/11, Campagnolo (freehub sold separately)
- Includes a Tubeless Ready (TLR) rim strip, TLR valve stem and internal cam quick release
- No rider weight restrictions

Part #	Size	FT/RR	Type	Colour	Speed (Axle)	Hub OLD	Holes	Butting	Weight
538501	700c	Front	TLR/Clincher	Charcoal/Red		100mm	18	14/15/14	675g
538502	700c	Rear	TLR/Clincher	Charcoal/Red	10/11	130mm	24	14/15/14	910g

Race TLR

A dependable, Tubeless Ready wheel that delivers stiffness and stability for high-end performance.

OFFSET SPOKE BED

TUBELESS READY

- Tubeless Ready (TLR) rims allow for quick transition to a tubeless system
- The offset spoke bed reduces wheel dish for a stiff and stable performance
- Lightweight alloy rim (23mm outer, 17.5mm inner width)
- Compatible with Shimano 10/11 speed, SRAM 10/11 freehubs
- Includes a Bontrager Tubeless Ready (TLR) rim strip, TLR valve stem and quick release
- No rider weight restrictions

Part #	Size	FT/RR	Type	Colour	Speed (Axle)	Hub OLD	Holes	Butting	Weight
429870	700c	Front	TLR/Clincher	Black		100mm	18	14/15/14	700g
439410	700c	Rear	TLR/Clincher	Black	11	130mm	24	14/15/14	1,020g

Paradigm Elite TLR Disc New

Tubeless Ready alloy wheels that deliver pro-level disc brake performance without the pro-level price tag.

INTERCHANGEABLE AXLES

OFFSET SPOKE BED

STACKED LACING

TUBELESS READY

- Reinforced Spoke Nodes feature localised materials to strengthen the rim at the spoke entrance
- Stacked lacing alignment provides a better spoke bracing angle for a stiffer wheel
- Tubeless Ready (TLR) rims allow for quick transition to a tubeless system upgrade
- The offset spoke bed reduces wheel dish for a stiff and stable performance
- Interchangeable axles allow for compatibility with more frames and forks
- Lightweight alloy rim (23mm outer, 19.5mm inner width)
- Compatible with Shimano 10/11spd, SRAM 10/11, Center Lock
- No rider weight restrictions

Part #	Size	FT/RR	Type	Colour	Speed (Axle)	Hub OLD	Holes	Butting	Weight

Featured Product

Kovee XXX Boost TLR 29

A USA-made carbon mountain racing wheel with a wide profile and the stiffness of Boost.

Finally, a race-spec carbon wheelset designed, engineered and handmade in Waterloo, WI. Using advanced OCLV Carbon, the Kovee XXX 29 Boost wheels bring a wider 29mm internal-width rim to proven DT Swiss 240 hubs to create a new benchmark in how a carbon racing wheelset can perform.

OCLV
OPTIMUM COMPACTION LOW VOID

TUBELESS READY

1. 
An ultra-durable OCLV Carbon rim with a 29mm internal, 34mm external width 28 hole fr/r

2. 
The 54-tooth DT Swiss hub instantly transfers effort into forward momentum

3. 
Boost 110/148 provides a wider bracing angle and dramatically increases wheel stiffness

Paradigm Comp TLR Disc New

Tubeless Ready alloy wheels that deliver pro-level disc brake performance without the pro-level price tag.

INTERCHANGEABLE AXLES · OFFSET SPOKE BED · STACKED LACING · TUBELESS READY

- Stacked lacing alignment provides a better spoke bracing angle for a stiffer wheel
- Tubeless Ready (TLR) rims allow for quick transition to a tubeless system upgrade
- The offset spoke bed reduces wheel dish for a stiff and stable performance
- Interchangeable axles allow for compatibility with more frames and forks
- Lightweight alloy rim (23mm outer, 19.5mm inner width)
- Compatible with Shimano 10/11spd, SRAM 10/11, Center Lock freehubs
- Includes a Bontrager TLR rim strip, TLR valve stem and internal cam quick release
- No rider weight restrictions

Part #	Size	FT/RR	Type	Colour	Speed (Axle)	Hub OLD	Holes	Butting	Weight
536805	700c	Front	TLR/Clincher	Charcoal/Red		100mm	24	14/15/14	765g
536806	700c	Front	TLR/Clincher	Charcoal/Red		100mm	24	14/15/14	755g

Kovee XXX Boost TLR 29 New

A USA-made carbon mountain racing wheel with a wide profile and the stiffness of Boost.

OCLV OPTIMUM COMPACTION LOW VOID · TUBELESS READY

- An ultra-durable OCLV Carbon rim with a 29mm internal, 34mm external width 28 hole fr/r
- The 54-tooth DT Swiss hub instantly transfers effort into forward momentum
- Boost 110/148 provides a wider bracing angle and dramatically increases wheel stiffness
- Tubeless Ready (TLR) rims allow for quick transition to a tubeless system upgrade
- The OCLV is ultra-light, compliant and durable: the most advanced carbon available
- DT Swiss Aerolite spokes and Alpina alloy locking hex-head nipples
- Center Lock disc, Shimano 10/11 speed and Sram XD driver available separately
- Includes an installed TLR rim strip, TLR valve and valve core removal tool

Part #	Size	FT/RR	Type	Colour	Speed (Axle)	Hub OLD	Holes	Butting	Weight
513933	29"	Front	TLR/Clincher	Black/Red		110mm	28	14/17/14	640g
513935	29"	Rear	TLR/Clincher	Black/Red	10/11	148mm	28	14/17/14	750g

XXX TLR 29 Boost

A race day wheel capable of the all-out, cross-country speed and laser handling needed to charge the podium.

OFFSET SPOKE BED · STACKED LACING · TUBELESS READY · RAPID DRIVE

- The Rapid Drive hub design instantly transfers effort into forward momentum
- Boost hub width (148r/110fr) and stacked lacing dramatically increase stiffness
- Tubeless Ready (TLR) rims allow for quick transition to a tubeless system
- The offset spoke bed reduces wheel dish for a stiff and stable performance
- A lightweight alloy rim (24mm outer, 21mm inner width) with DT Swiss hubs
- Center Lock 110x15 front hub, 148x12 rear hub
- Includes a Tubeless Ready (TLR) rim strip, TLR valve and interchangeable axle parts
- 86kg (190lb) rider weight limit

Part #	Size	FT/RR	Type	Colour	Speed (Axle)	Hub OLD	Holes	Butting	Weight
518955	29"	Front	TLR/Clincher	Black		110mm	28	14/17/14	690g
518956	29"	Rear	TLR/Clincher	Black	10/11	148mm	28	14/17/14	766g

XXX TLR 29

A race-day wheel capable of the all-out, cross-country speed and laser handling needed to charge the podium.

INTERCHANGEABLE AXLES · OFFSET SPOKE BED · STACKED LACING · TUBELESS READY · RAPID DRIVE

- The Rapid Drive hub design instantly transfers effort into forward momentum
- Stacked lacing alignment provides a better spoke bracing angle for a stiffer wheel
- Tubeless Ready (TLR) rims allow for quick transition to a tubeless system
- The offset spoke bed reduces wheel dish for a stiff and stable performance
- A lightweight alloy rim (24mm outer, 21mm inner width) with DT Swiss hubs
- Center Lock QR15 front hub, 135/142 QR rear hub
- Includes a Tubeless Ready (TLR) rim strip, TLR valve, interchangeable axle parts and lock ring
- 86kg (190lb) rider weight limit

Part #	Size	FT/RR	Type	Colour	Speed (Axle)	Hub OLD	Holes	Butting	Weight
432706	29"	Front	TLR/Clincher	Black		100mm	28	14/17/14	680g
432705	29"	Rear	TLR/Clincher	Black	10/11	135/142mm	28	14/17/14	760g

Kovee Pro TLR 27.5 New

A highly durable Tubeless Ready carbon mountain wheel.

INTERCHANGEABLE AXLES · OFFSET SPOKE BED · OPTIMUM COMPACTION LOW VOID · TUBELESS READY

- The OCLV is ultra-light, compliant and durable: the most advanced carbon available
- The offset spoke bed reduces wheel dish for a stiff and stable performance
- Tubeless Ready (TLR) rims allow for quick transition to a tubeless system upgrade
- An ultra-durable carbon rim (29mm outer, 22.5mm inner width) with 3-pawl drive system
- 14/15/14 gauge spokes with Alpina locking alloy hex head nipples
- CenterLock disc, Shimano 10/11 and Sram 11 sp xd driver available separately
- Includes an installed TLR rim strip, TLR valve and valve core removal tool

Part #	Size	FT/RR	Type	Colour	Speed (Axle)	Hub OLD	Holes	Butting	Weight
530005	27.5"	Front	TLR/Clincher	Charcoal/Red		100mm	28	14/15/14	679g
530006	27.5"	Rear	TLR/Clincher	Charcoal/Red	10/11	135/142mm	28	14/15/14	898g

Kovee Pro Boost TLR 27.5 New

A highly durable Tubeless Ready carbon mountain wheel with the added stiffness of Boost.

OPTIMUM COMPACTION LOW VOID · OFFSET SPOKE BED · TUBELESS READY

- The OCLV is ultra-light, compliant and durable: the most advanced carbon available
- The offset spoke bed reduces wheel dish for a stiff and stable performance
- Tubeless Ready (TLR) rims allow for quick transition to a tubeless system upgrade
- Boost 110/148 wider hub flanges enhance the bracing angle for a stiffer wheel
- An ultra-durable carbon rim (29mm outer, 22.5mm inner width) with 3-pawl drive system
- 14/15/14 gauge spokes with Alpina locking alloy hex head nipples
- Center Lock disc, Shimano 10/11 and SRAM XD driver available separately
- Includes an installed TLR rim strip, TLR valve and valve core removal tool

Part #	Size	FT/RR	Type	Colour	Speed (Axle)	Hub OLD	Holes	Butting	Weight
530007	27.5"	Front	TLR/Clincher	Charcoal/Red		110mm	28	14/15/14	689g
530008	27.5"	Rear	TLR/Clincher	Charcoal/Red	10/11	148mm	28	14/15/14	904g

Kovee Pro TLR 29 New

A highly durable Tubeless Ready carbon mountain wheel.

INTERCHANGEABLE AXLES · OFFSET SPOKE BED · OPTIMUM COMPACTION LOW VOID · TUBELESS READY

- The OCLV is ultra-light, compliant and durable: the most advanced carbon available
- The offset spoke bed reduces wheel dish for a stiff and stable performance
- Tubeless Ready (TLR) rims allow for quick transition to a tubeless system upgrade
- An ultra-durable carbon rim (29mm outer, 22.5mm inner width) with 3-pawl drive system
- 14/15/14 gauge spokes with Alpina locking alloy hex head nipples
- Center Lock disc, Shimano 10/11, Sram 11 sp xd driver available separately
- Includes an installed TLR rim strip, TLR valve and valve core removal tool

Featured Product

Line XXX Boost TLR 29

A USA-made carbon mountain wheel with a wide profile and the stiffness of Boost.

From trail to enduro, the Line XXX 29 Boost mountain bike wheels thrive in the harshest conditions. Designed, engineered and handmade in Waterloo, WI, this 29mm internal width carbon rim is 30% stiffer than its predecessor. If you want the ultimate upgrade that will take a beating and come back for more, this is your wheelset.

MTB wheel and tyre compatibility

Mountain bike wheel and tyre size options have broadened. There are more size combinations than ever before. This chart helps take the guesswork out of set-up, so you can get the most performance out of every ride.

This chart is designed to show the Bontrager wheel and tyre options that work best together and to point out some incompatibilities. Red indicates non-compatible, yellow is okay, and green gives the best rider experience. The sizes under each combination indicate measured tyre width for a given wheel/tyre combination.

Roll on.

For over a decade, Bontrager has developed a comprehensive line-up of bike tyres, today producing a selection of tyres suitable for just about any condition out on the trail, road or local path. From the puncture-resistant Hard-Case collection to the aerodynamic R4 Aero to a wide range of off-road treads, Bontrager has a tyre to handle it all.

Technology Glossary

Tyres

TLR -
Tyre is ready to accept self-sealing TLR Sealant as the final step in a worry-free, tubeless setup

Hard-Case -
Lightweight sub-tread material and sidewall reinforcement reduce punctures and sidewall cuts

Hard-Case Lite -
Lightweight sub-tread material protects against punctures

Hard-Case Ultimate -
Dual-layer sub-tread material and sidewall reinforcement virtually eliminate punctures and cuts

Inner Strength Casing -
Lightweight sidewall protection is supple and strong

Core Strength Casing -
3-piece tread and sidewall underlay increases protection, stays supple and light

Aero Wings -
Unique bead profile closes the gap between rim and tyre for improved aerodynamics

Dual-Ply -
Dual-layer casing adds stability in larger-volume, heavy-duty mountain bike tyres

How to choose an MTB tyre

Versatile + Trail

XR

Tread patterns to suit any trail
Inner Strength Casing

XC Race

XR0
Fastest rolling, lightweight, excels in hardpack conditions

XR1
Fast rolling, excels in hardpack and loamy conditions

Trail

XR2
Fast rolling, consistent traction, excels in loose over hardpack and loamy conditions

XR3
Traction, versatility, excels in a variety of conditions

Tech Trail

XR4
Aggressive tread, durability, excels in loose and rocky conditions

Scenario 1

A cross-country trail rider that rides for fitness and competition. A general ride consists of hammering smooth and flowy singletrack. Tyres need to provide light, fast-rolling traction.

Best tyre: XR1

Fast rolling traction in a lightweight tyre that excels in loose over hardpack. Combine with an XR0 on the rear for the ultimate in light weight and fast rolling. Combine with an XR2 on the front for more traction and versatility in rougher terrain.

Scenario 2

The rider that wants one set of tyres for every trail. Tyres need to work well on rocky and loose terrain as well as smooth and flowy singletrack.

Best Tyre: XR3

A versatile, quick rolling tread design that is at home on any trail. Combine with an XR2 on the rear for a little more speed and to save some weight. Combine with an XR4 on the front for more traction and confidence on rough trails.

Traction + Tough

SE

Durable traction for the most demanding trails
Core-Strength Casing

SE2
Fast rolling, durability, excels on fast hardpack trails

SE3
Versatile traction, excels on a variety of trails

SE4
Aggressive tread, traction, excels in loose and rocky conditions

SE5
Most aggressive tread, traction, excels in loose rocky and wet conditions

Scenario 3

The aggressive rider that demands traction in a tyre that will hold up to the most demanding terrain. This rider gravitates towards rough, rocky and often wet trails that are ridden hard.

Best Tyre: SE5

An aggressively treaded super enduro tyre that provides incredible traction and durability. Combine with an SE4 on the rear for a slightly faster rolling set-up that saves a little weight.

Tyres

XR0 Team Issue

An ultra-lightweight XC race mountain bike tyre with low rolling resistance.

- Excels in hardpack conditions
- Dual directional tread design

1. 
Excels in loose and rocky conditions

2. 

The Tubeless Ready (TLR) tyre is engineered for easy tubeless set up and puncture protection

3. 
Core Strength has sidewall and sub-tread protection for lightweight durability

SE2 Team Issue TLR

TUBELESS READY CORE STRENGTH

A versatile and fast enduro-ready tyre that excels in loose over hard pack.

- Engineered for all-around Enduro use on dry fast courses
- A TLR tyre engineered for use with TLR sealant for worry-free set up and puncture protection
- Core Strength has reinforced the sidewall and sub-tread protection for lightweight durability

Part #	Size	TPI	Durometer	Bead	Type	Puncture Protection	Colour	Weight
523552	27.5" x 2.3	60 tpi	61a/50a	Aramid	TLR/Clincher	Nylon Breaker	Black	905g

SE3 Team Issue TLR

TUBELESS READY CORE STRENGTH

A fast rolling enduro tyre with a versatile tread pattern that is ready to rail.

- Excels in a wide variety of conditions
- The Tubeless Ready (TLR) tyre for easy tubeless set-up and puncture protection
- Core Strength has sidewall and sub-tread protection for lightweight durability

Part #	Size	TPI	Durometer	Bead	Type	Puncture Protection	Colour	Weight

528705	29" x 2.4	60 tpi	61a/50a	Aramid	TLR/Clincher	Black	905g

SE5 Team Issue TLR

TUBELESS READY

CORE STRENGTH

Severe traction for the most aggressive conditions, yet light enough to climb back up.

- Excels in loose, rocky and wet conditions
- The Tubeless Ready (TLR) tyre for easy tubeless set-up and puncture protection
- Core Strength has sidewall and sub-tread protection for lightweight durability

Part #	Size	TPI	Durometer	Bead	Type	Puncture Protection	Colour	Weight
505085	27.5" x 2.3	60 tpi	61a/50a	Aramid	TLR/Clincher	Reinforced	Black	935g
505086	29" x 2.3	60 tpi	61a/50a	Aramid	TLR/Clincher	Reinforced	Black	990g

G4 Team Issue

DUAL-PLY

DH tyre eats up loose, rocky conditions on biggest, roughest tracks.

- Excels in dry and rocky conditions
- Ramp edges for fast rolling
- Large centre knobs improve handling and traction
- Sipes for increased traction on slippery roots and rocks
- The Dual-Ply multi-layer casing adds stability in larger-volume, heavy-duty tyres

Part #	Size	TPI	Durometer	Bead	Type	Colour	Weight
434488	27.5" x 2.35	60 tpi	42a	Wire	Clincher	Black	1295g

G5 Team Issue

Biting traction to tame even the most aggressive DH tracks.

DUAL-PLY

- Excels in loose, rocky and wet conditions
- A centre knob tie-bar increases braking traction
- Dual-step shoulder knobs for high lean angle traction
- Open tread spacing is self-cleaning
- The Dual-Ply multi-layer casing adds stability in larger-volume, heavy-duty tyres

Part #	Size	TPI	Durometer	Bead	Type	Colour	Weight
431184	26" x 2.35	60 tpi	42a	Wire	Clincher	Black	1265g
434490	27.5" x 2.35	60 tpi	42a	Wire	Clincher	Black	1315g
434492	27.5" x 2.5	60 tpi	42a	Wire	Clincher	Black	1390g

G Mud Team Issue

A durable mountain bike tyre with trimmable knobs adapt to changing conditions.

DUAL-PLY

- Excels in DH racing in muddy, wet conditions
- The Dual-Ply multi-layer casing adds stability in larger-volume, heavy-duty tyres
- Trimmable knobs for custom performance
- Developed for use at World Cup racing level

Part #	Size	TPI	Durometer	Bead	Type	Colour	Weight
438291	27.5" x 2.3	60 tpi	40a	Wire	Clincher	Black	1245g

Featured Product

Barbegazi TLR

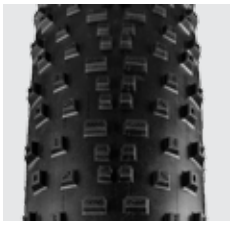

An ultra-fat, versatile fat bike tyre to keep rolling through deep snows and the most rugged trails.

The small white-furred, long-bearded men with enormous feet of Swiss folklore the Barbegazi only emerge from their cave after the first snowfall. The aptly-named, ultra-fat, Tubeless Ready, Barbegazi TLR gives you the float and traction to take on any winter trail. 4.7 inches of aggressive tread floats over and bites into everything in its path.

INNER STRENGTH

TUBELESS READY

1 

Excels in deep snow, sand and rough terrain

2 

The Tubeless Ready (TLR) tyre for easy tubeless set-up and puncture protection

3 

The Inner Strength casing is lightweight sidewall protection that's also supple and strong

Barbegazi TLR New Size

TUBELESS READY INNER STRENGTH

An ultra-fat, versatile fat bike tyre to keep rolling through deep snows and the most rugged trails.

- Excels in deep snow, sand and rough terrain
- The Tubeless Ready (TLR) tyre for easy tubeless set-up and puncture protection
- The Inner Strength casing is lightweight sidewall protection that's also supple and strong

Comfort and performance through science.
Selecting a bike saddle is arguably the most personal component choice made by any rider. That's why every Bontrager saddle is backed by the Unconditional Comfort Guarantee — so you can be confident in your choice.

Technology Glossary

Saddles

Suspended rails -
Unique construction houses saddle rails in a suspended rear garage, increasing compliance for ultimate comfort

Size Specific Curvature -
Curvature of each saddle is designed specific to its width

Contour Relief Zone Plus -
Cutaway design eliminates contact point on targeted soft tissue areas

Zone Density Foam -
Multi-density padding is strategically placed for optimal comfort and performance

Channel Flex -
Small channels through bottom of saddle shell add compliance and comfort

FlexForm -
Allows the saddle to pivot with the rider's natural pedal stroke for a noticeably smoother ride

Posture 1 -
Aerodynamic: The most forward pelvic rotation, common in triathlon and time trial

Posture 2 -
Aggressive: Forward pelvic rotation for athletes with a high degree of flexibility

Posture 3 -
Performance: Neutral pelvic rotation for a balance of comfort and efficiency

Posture 4 -
Fitness: Upright pelvic rotation for athletic riders looking to go further, faster

Posture 5 -
Leisure: The most upright pelvic rotation for recreational riders seeking maximum comfort

Smart Cover -
Proprietary cover compound delivers targeted zones of unique support for sustained comfort

Featured Product

Ajna Elite Women's Saddle

A lightweight, high-performance, Posture 2 cutout saddle for women road or mountain riders.

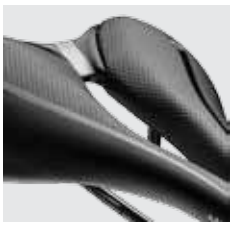

The Ajna Elite is the cutout saddle that every serious female rider can appreciate. Built to be at home on either your road or mountain bike in an aggressive Posture 2 position, the Ajna's shape offers increased stability at the nose and better pressure distribution throughout.

1 

An aggressive Posture 2 saddle that excels both on the road and mountain bike

2 

Engineered specifically to provide a better fit and greater comfort for women

3 

Suspended hollow Ti rails increase compliance for ultimate comfort

Saddles

Ajna Pro Carbon Women's Saddle New

ZONE DENSITY PADDING · CONTOUR RELIEF ZONE PLUS · SUSPENDED RAILS · POSTURE 2– AGGRESSIVE

An ultra-light, high-performance, Posture 2 cutout saddle for women road or mountain racers.

- An aggressive Posture 2 saddle that excels both on the road and mountain bike
- Engineered specifically to provide a better fit and greater comfort for women
- Suspended oversize carbon rails increase compliance for ultimate comfort
- A wider cutout and shaped nose provide a stable comfort in an aggressive position
- The Contour Relief Zone Plus (CRZ+) full saddle cutaway enhances soft-tissue protection
- The carbon fibre-reinforced shell strikes a balance between strength and a light weight
- inForm BioDynamic products optimise your natural movement for sustained, higher performance
- Requires specific seat post ear clamps for oversized saddle rails

Seatmast Cap Length Guide

To determine your necessary mast cap height, measure from the BB centre to the top of the saddle
This measurement assumes a 4cm distance from the rail centre to the saddle top
Always ensure a minimum insertion distance on the mast cap to protect the integrity of your frame
If your measurement allows use of either height mast cap, the shorter cap will result in a more compliant ride

	Bike size (cm)									
Seatmast cap length	**44**	**47**	**50**	**52**	**54**	**56**	**58**	**60**	**62**	**64**
Long	59.5-65.5	63.5-69.5	66.5-72.5	69.5-75.5	72-78	75-81	77-83	79-85	81-87	84-90
Short	55.1-61.5	59.5-65.5	62.5-68.5	65.5-71.5	68-74	71-77	73-79	75-81	77-83	80-86

436174

436173

Bontrager Speed Concept Seatpost

- Construction: OCLV aero shaft and head
- Forged alloy saddle clamps
- 2-bolt micro-adjust head mechanism with thumb wheel angle indicator for precise angle adjustment
- Unique clamp shape with spring assist allows for super-easy saddle changes
- Compatible with standard and oversized carbon saddle rails
- Longer bottom clamp better supports saddle rails - shorter top clamp allows plenty of fore-aft adjustment
- 15mm offset has a reversible design so it can be run in the forward position
- Fits 2014 9 and 7-series Speed Concept

Part #	Model	Offset	Length	Colour
436176	9-Series Carbon Post	50mm	335mm	Carbon

436173	9-Series Carbon Post	15mm	275mm	Carbon

436585

Bontrager XXX Seatpost

- The CnD shape profile increases torsional stiffness and vertical compliance
- Designed to offer increased compliance at maximum and minimum insertion points
- The 2-bolt design offers independent setback and tilt adjustments (+/- 12 degrees)
- 100% OCLV carbon fibre shaft and head
- Includes 7x7mm round rail clamp compatibility
- Carbon 7x10mm saddle ears sold separately

Featured Product

Drop Line Dropper Seatpost

A cable-actuated dropper post with infinite travel adjust.

Dropper posts are awesome... until they're not. That's why we created the Drop Line to be the one you can rely on. From installation to activation, no other dropper post can withstand the rigours of real-world riding and just keep functioning. And since cable installation is so easy, swapping from bike-to-bike is as easy as with a non-dropper seat post .

1. 

Remote cable actuation with an ergonomically designed under-bar lever

2. 

The air-sprung hydraulic locking cartridge offers infinite adjustability within dropping range

3. 

A keyed chassis prevents rotation for a stable ride

532623

Bontrager Drop Line Dropper Seatpost New

- Remote cable actuation with an ergonomically designed under-bar lever
- The air-sprung hydraulic locking cartridge offers infinite adjustability within dropping range
- A keyed chassis prevents rotation for a stable ride
- The 2-bolt rocker head with micro adjustment allows for easy saddle tilt adjustment
- Internal cable routing keeps housing tucked away and free from moving wheels
- Includes cable, housing and 1x under-bar remote lever
- On-Bar Drop Line Universal Lever sold separately
- The frame must be compatible with internally routed seat post routing

Part #	OD	Length	Colour	Weight

Featured Product

Pro Blendr 7 Degree Stem

A light and stiff alloy stem, with Blendr accessory integration.

Outfit your road bike with the Pro Blendr stem to provide confident handling and integrated accessory capability. The forged alloy construction means that you'll get the stiffness you demand but in a weight that'll make others jealous. And with Blendr, your accessory integration has never looked better.

BLENDR

1 

The pro-level quality 31.8mm clamp diameter stem weighs less than many carbon stems

2 

Blendr technology seamlessly integrates accessories with the included Blendr Pro base and Blendr XXX accessory mounts

3 

Blendr XXX mounts include Bontrager Ion and Trip, Garmin, GoPro and SRM accessories

Bontrager XXX Bar/Stem Blendr Base

Featured Product

Line Pro 35 0 Degree Stem

An oversized diameter and lightweight 35mm mountain stem for the burliest mountain riders.

Equip your whip with this 35mm Line Pro stem and give yourself the oversized advantage today. Forged from 6061-T6 3D aluminium, this finely finished stem provides the increased strength of the latest mountain-specific bar diameter at the lightest weight possible.

1. 
A pro-level quality stem in an oversized 35mm clamp diameter for increased strength and minimal weight

2. 

Forged from 6061-T6 3D aluminium

3. 
Laser-etched calibration marks make dialling in the perfect angle simple and repeatable

535484

Bontrager Line Pro 35 0 Degree Stem New

- A pro-level quality stem in an oversized 35mm clamp diameter for increased strength and minimal weight
- Forged from 6061-T6 3D aluminium
- Laser-etched calibration marks make dialling in the perfect angle simple and repeatable
- High-strength corrosion-resistant steel bolts to ensure the freshest look for longer
- Available in a wide range of sizes for today's mountain rider
- Safe for carbon bars
- Not safe for carbon steerer tubes

504460

Bontrager Rhythm Elite 0 Degree MTB Stem

- Constructed of 6061-T6 alloy with wide 4-bolt faceplate
- Opposing 2-bolt clamp provides secure interface with steerer tube
- Uses M5 corrosion-resistant steel bolts with 5.2Nm torque spec
- Not for use on carbon steerer tubes
- Safe for use with alloy or carbon handlebars

Featured Product

Pro IsoCore VR-SF Road Bar

This carbon road bar virtually eliminates road chatter, with the bar profile optimised for greater access to controls.

Take on longer rides and rougher roads with the Pro IsoCore road handlebars. Feel the difference 20% less road vibrations can make on your next gravel grinder or gran fondo. IsoCore inner-laminar technology and IsoZone padding combine to virtually eliminate road chatter while maintaining the strength of our OCLV carbon.

Featured Product

Line Pro Pedal

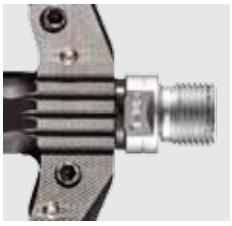

A grippy, durable flat pedal for trail and park use.

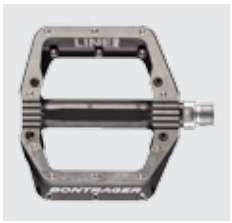

Flat pedals are the preferred choice of downhillers, dirt jumpers and enduro riders, but any trail rider can reap the benefits of a pedal born from the demands of those elite riders.

1 

Dial in your preferred traction with tunable pin placement and contact height

2 

Durable axle spins on sealed cartridge bearings

3 

The pedal body is made from 6061-T6 aluminium

Pedals

524431

Bontrager Line Pro Pedal New

- Dial in your preferred traction with tunable pin placement and contact height
- Durable axle spins on sealed cartridge bearings
- The pedal body is made from 6061-T6 aluminium

Part #	Model	Threading	Style	Colour	Weight
524431	Line Pro	9/16in(15mm)	Mountain	Black	365g
531577	Line Pro	9/16in(15mm)	Mountain	Orange	365g

Forks

511783

Bontrager Bowie Pro 29+ Fork

- Full carbon construction with a tapered 1-1/8" - 1.5" head tube
- 29er-specific 51mm offset
- Accepts Post Mount brakes, up to 210mm max rotor size
- 495mm axle-to-crown length, fits up to 3.0" tyres
- Includes a 100x15mm thru axle and carbon compression steerer plug
- Replaceable Carbon Armor drop-out guards

Part #	Size	Steerer OD	Rake	Axle to Crown	Color
511783	29"	28.6mm (1 1/8")	51mm	495mm	Carbon

524831

Bontrager Haru Pro Fatbike Fork

- Full OCLV Carbon construction with a tapered 1-1/8 -1.5" head tube
- 51mm offset
- Accepts Post Mount brakes, up to 210mm max rotor size
- 490mm axle-to-crown length, fits up to 26 x 4.8" or 27.5 x 3.8" tyres
- Includes a 150x15mm thru axle and carbon compression steerer plug
- Carbon Armor replaceable drop-out guards

Part #	Size	Steerer OD
524831	26"	28.6mm (1 1/8")

OCLV OPTIMUM COMPACTION LOW VOID

Mudguards

420753

Bontrager NCS Fender

- Fully assembled mudguards that install in minutes with only two tools
- No-cut struts allow quick strut adjustment for proper tyre clearance
- Made of lightweight yet super-durable polycarbonate
- The double-back strut on rear mudguard adds support and stability
- Stainless steel hardware
- 26" fits 1.75-2.25" width tyres

Part #	Model	Size	Location	Colour
420753	NCS-1 (1.75-2.25)	26"	Fork Eyelets/Seatstays	Black
420751	NCS-1 (18-25mm)	700c	Fork Eyelets/Seatstays	Black
420752	NCS-1 (28-35mm)	700c	Fork Eyelets/Seatstays	Black

Chain

424631

269736

269735

Bontrager Chainstay Protectors

- Quietens chain slap and protects chainstays from nicks and scratches
- Standard protector fits most chainstays
- Universal kits come with circle protectors to eliminate frame damage due to cable rub

Part #	Model	Use with	Colour
424631	Chainstay Protector Long	Most Chainstays	Black
269736	Chainstay Protector Universal	All Chainstays	Carbon
269735	Chainstay Protector Universal	All Chainstays	Clear

Brakes

431461

Bontrager Carbon Stop Cork

- Engineered especially for use with carbon rims
- Designed by Keith Bontrager for professional cyclists
- The unique cork compound reduces braking heat and wear on the rim

Part #	Model	Type	Use with	Attachment	Colour
431461	Shimano Compatible 2 Slot	Cork	Carbon Rims	Pad	Brown
426805	Campagnolo Compatible w/Slot	Cork	Carbon Rims	Pad	Brown

520554

520555

Bontrager Black Prince New

- Designed for use on carbon rims
- Confirm wheel compatibility before use
- Use in mud and grit will accelerate rim wear
- 520554 is the Shimano style Flash Evo and fits Shimano and Sram
- 520555 is the Campagnolo style Race Pro

Part #	Model	Type	Use with	Attachment
520554	Flash Evo	Carbon	For Carbon Wheels Only	Bolt-In
520555	Race Pro	Carbon	For Carbon Wheels Only	Bolt-In

Cables & Housing

415639

Bontrager Brake Cables - File Box

- Compatible with all Shimano and SRAM systems
- The smooth surface reduces friction and improves performance
- All cables are pre-stretched to ensure consistent adjustment
- 100 cables per box

Part #	Style	Cable OD	Length	Material	Qty.
415639	Mountain	1.5mm	2250mm	Stainless Slick	100
415546	Road	1.5mm	2250mm	Stainless Slick	100

415545

Bontrager Derailleur Cables - File Box

- Compatible with all Shimano and SRAM systems
- The smooth surface reduces friction and improves performance
- All cables are pre-stretched to ensure consistent adjustment
- 100 cables per box

Part #	Style	Cable OD	Length	Material	Qty.
415545	Universal	1.1mm	2250mm	Stainless Slick	100

62244

Bontrager Brake Cable Housing

- A specially formulated plastic liner prevents brittleness
- SLR/M housing compatible

Part #	Model	Diameter	Length	Material	Qty.
62244	Brake Cable Housing CEX	5mm	30m	Plastic	1

62247

Bontrager Derailleur Cable Housing

- Rigid, low-compression, high-carbon steel casing
- A double plastic layer for increased weatherproofing and durability
- The L3 housing (410736) has a lubricated inner liner for improved shifting performance, especially with 10-speed drive trains

Part #	Model	Diameter	Length	Material	Qty.

410745

Bontrager RL Tri Cage

- Nylon Composite material is super-strong
- The cage is specifically designed to fit on a rear bottle holder
- The innovative design makes gravity work for you, not against you
- Reversible for left or right entry

Part #	Model	Material	Colour
410745	RL Tri Cage	Nylon	Black

406924

Bontrager RL Rear Cage Holder

- Fits on most metal saddle rails (do not use on carbon seat rails)
- Comes with two rear-specific cages to hold bottles behind the saddle
- Multiple holes for strapping spare tubes, tyres and essentials
- Also holds two CO_2 cartridges and one quick-inflate head

Part #	Model	Material	Colour
406924	Race Lite	Nylon	Black

436151

Bontrager Speed Concept Water Bottle Cage

- Carbon fibre cage construction
- Designed to be mounted to the Speed Concept Mono extensions
- The moveable track mounts to standard water bottle spacing and is easily adjustable
- The integrated computer mount accepts standard bar-mounted computer mounts
- Adapter for SRM computer mounts included

Technology Glossary

Bags

Interchange -
Accessory interface allows convenient tool-free on and offs

Interchange Transit -
Simple tool-free attachment system for easy on and offs

433259

Bontrager Town Small Shopper Bag

- Transit hooks secure the bag to most rear racks
- Removable shoulder strap
- Carry handles snap together for convenience
- The reflective trim enhances visibility for maximum safety
- 18-litre (1,100 cu. in.) capacity

Part #	Model	Dimensions	Colour
433259	Town Shopper Small	30 cm (l) x 18 cm (w) x 30 cm (h)	Black

INTERCHANGE TRANSIT WATER RESISTANT

433258

Bontrager Town Large Shopper Bag

- Transit hooks, a lower hook and a loop strap secure the bag to most rear racks
- Zip-up top with centre strap to compress smaller loads
- Two zipped pockets: one external, one internal
- The reflective trim enhances visibility for maximum safety
- 28-litre (1,700 cu. in.) capacity

Part #	Model	Dimensions	Colour
433258	Town Shopper Large	33 cm (l) x 17 cm (w) x 50 cm (h)	Black

INTERCHANGE TRANSIT WATER RESISTANT

433260

Bontrager Town Double Throw Pannier

- Transit hooks, a lower hook and a loop strap secure the bag to most rear racks
- Easy-carry top handle
- Two external zip pockets
- One internal zipped pocket
- The reflective trim enhances visibility for maximum safety
- Internal 15" laptop sleeve

BackRack	More bike compatibility	– Interchange compatible – Includes top plate – Available in S and L – Lightweight alloy struts – Stainless steel hardware – Disc brake version

What is daylight visibility?

The idea of daylight visibility is simple – be seen on the road, during the day. Cyclists and cars share the same roads and streets and need to be aware of one another. Cars come as standard with daytime lights, brake lights and indicators to make them easier to see and communicate where they are, and where they are going. It is no different for cyclists. The idea of daylight visibility is the idea of taking every precaution to make sure that as a cyclist you can be seen by the all users of the road.

Why is daylight visibility important?

– 80% of cycling accidents occur during the day[1]

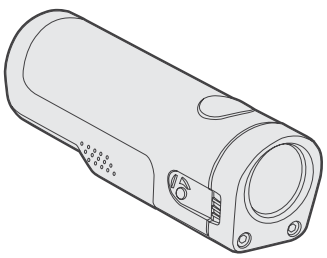

– 40% of US cycling fatalities are hit from behind[2]

– Studies show that riders overestimate their visibility by 700%[3]

[1]"Reported Road Casualties Great Britain: 2013: Main Results", Department for Transport, 2014
"Collisions Involving Cyclists on Britain's Roads: Establishing the Causes", TRL Report PPR 445, 2009
[2]Every Bicyclist Counts, League of American Bicyclists, May 2014
[3]Wood, Tyrell, 2012 (Queensland University Technology and Clemson University)

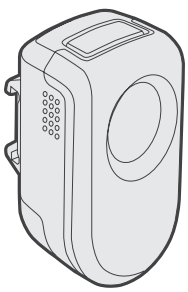

How do cyclists achieve daylight visibility?

Properly attaching a daylight visible light that is set to the proper day flash mode is the easiest way to add an element of daylight visibility to any bike and cyclist. Remember that day flash modes are great for use during the day, but can be overwhelming for use after dark. Each light has specific night modes that are better suited for night-time use.

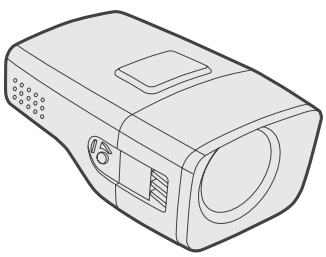

Ion 800 R/RT

Focused optics, 800 Lumens and five modes in a sleek USB-chargeable package.

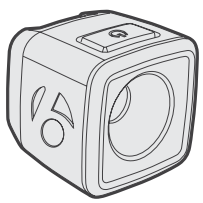

Flare R/RT

A daylight visible rear light with 65 Lumens of balanced light that is visible up to 2 kilometres away.

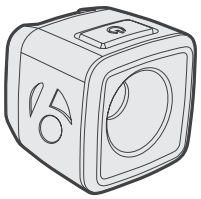

Ion 350 R/RT

A low-profile light that comfortably mounts to helmets or bars to help a rider see and be seen.

Flare R City

A daylight visible rear light with 35 Lumens of broad light to keep you seen in the city day or night.

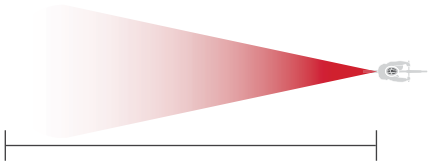

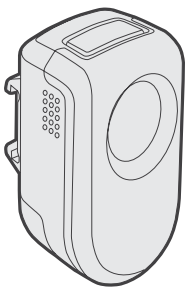

Flare R City

Optimised for city and urban riding

- More junctions
- Increased proximity to cars
- Cars travelling at slower speeds

Wide angle beam

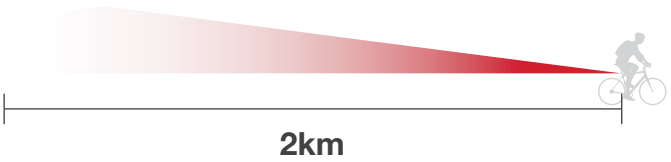

Flare R/RT

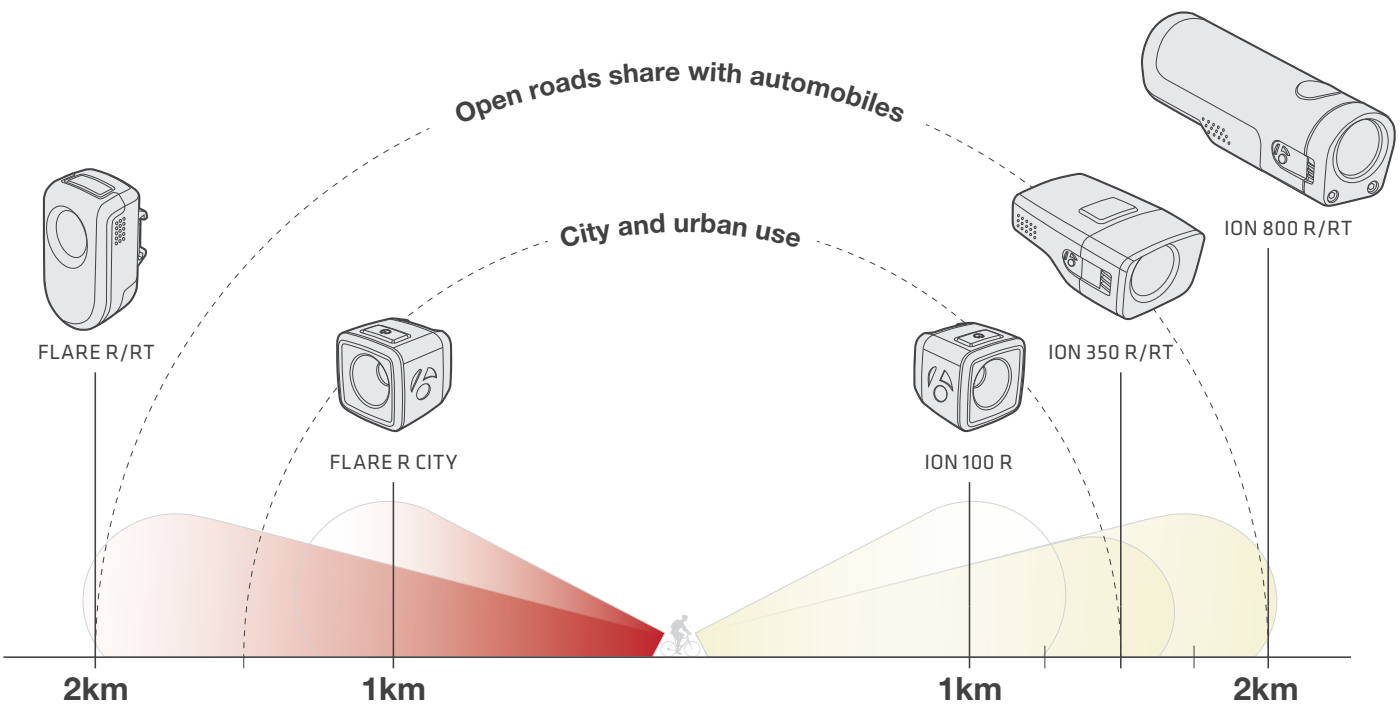

Optimised for open road riding

- Shared and open roads
- Proximity to cars at high speeds
- Large sight distances from cars

Ultra long distance beam

Daytime Visibility Distance

	Model	Intended use	Upgrades	Modes	Mounting options	Extra
Highest performance ↕ **Value priced**	**Flare RT**	Best light for use on the road day and night, 2km visible with Transmitr wireless control	USB rechargeable, 65 Lumens, Transmitr compatible, side LEDs	Five modes (day flash, all-day flash, night flash, day steady, night steady)	Quick connect	USB compatible, Daylight visible, Transmitr compatible
	Flare R	Best light for use on the road day and night, 2km visible	USB rechargeable, 65 Lumens, side LEDs	Five modes (day flash, all-day flash, night flash, day steady, night steady)	Quick connect	USB compatible, Daylight visible
	Flare RT City	Best light for use in the city day and night, 400m visible with Transmitr wireless control	USB rechargeable, 35 Lumens, Transmitr compatible, ambient light sensor	Four modes (day flash, night flash, day steady, night steady)	Quick connect	USB compatible, Daylight visible, Transmitr compatible
	Flare R City	Best light for use in the city day and night, 400m visible	USB rechargeable, 35 Lumens, ambient light sensor	Four modes (day flash, night flash, day steady, night steady)	Quick connect	USB compatible, Daylight visible
	Flare 3	Brighter with more options for heavy commuting	Two .5 Watt LEDs and 2 bright LEDs	Three modes (steady, strobe and random flashing)	Quick connect	Quick connect
	Flare 1	Higher run time for frequent use	2 more LEDs than Ember	Three modes (steady, strobe and random flashing)	Seat post clamp included, quick connect available	Quick connect
	Ember	Lightweight safety		Two modes (steady and strobe)	Silicone strap for quick installation	Will fit on back of Bontrager helmets

Featured Product

Flare R City

A daylight-visible rear light with 35 Lumens of balanced light to keep you seen in the city, day or night.

Make every ride safer with a rear light designed for daylight visibility. Flare R City is designed for city and urban use with balanced optics and a powerful CREE LED design that provide true daytime visibility.

1

35 Lumens provide visibility from over 400m day or night

2

Wide visibility angle intended for city use

3

Two day-time visibility modes and two night modes

536548

Bontrager Flare R City New

- 35 Lumens provide visibility from over 400m day or night
- Wide visibility angle intended for city use
- Two day-time visibility modes and two night modes
- Day flash 35LM-5hrs, night flash 35LM-10hrs, day steady 10LM-5hrs, night steady 2LM-20hrs
- An integrated light sensor for auto-brightness control
- Battery save mode at 5% life helps to ensure a safe ride home with a depleted battery
- The Quick connect bracket with 16-degree offset compensates for the seat post angle
- Includes a Quick connect bracket and micro USB charging cable

419516

Bontrager TLR Flash Charger Floor Pump

436138

- An alloy barrel for smooth pump action
- The auto-select head effortlessly fits Presta or Schrader valves
- Top-mounted 160 psi gauge
- The three-arm base gives excellent stability
- Inflates tubeless-ready tyres without a compressor

Part #	Model	Colour
436138	TLR Flash Charger	Black

Bontrager Super Charger Floor Pump

436118

- All-aluminium barrel, base, handle and gauge construction is lightweight and durable
- The large, stable base minimises tipping
- Replaceable internals increase functional life span
- The Auto-select head with alloy levers instantly fits Presta and Schrader valves
- A built-in air release valve makes it easy to dial-in pressures
- The extra-large, raised 2.5" (6.5cm) gauge puts pressure info within easy view
- Long 45" (114cm) hose, max pressure 160 psi (11bar)

Part #	Model	Colour
436118	Super Charger	Polished Alloy

Bontrager Turbo Charger HP New

531521

- A tall profile and customised piston make for easier high-pressure inflation
- Steel construction and replaceable internals provide long-term durability
- The new, auto-select head instantly fits both Presta, Schrader and Dunlop valves
- The large, stable base minimises tipping
- A raised 5 cm (2") gauge eliminates eye strain by putting information within view
- The soft, co-moulded handle provides a secure grip and pumping comfort
- Long 45" (114cm) hose, max pressure 160 psi (11bar)
- The handle locks in place for transportation and storage

Part #	Colour
531521	Red

- A high-volume travel pump with protective bag
- A stable, folding foot for pumping ease
- The long hose gives versatility and saves your valve stems

Part #	Model	Colour
434464	Travel Charger	Black

Comparison chart
Floor pumps

	Name	Benefits
Best	**Super Charger**	– Adds complete polished alloy construction
	Turbo Charger HP	– Reduces barrel diameter to reduce efforts required of higher pressure tyres – Adds alloy lever and bezel on new head with air bleed
Better	**Turbo Charger**	– Adds locking handle for convenient transportation – Raises gauge to reduce eye strain – Adds soft, co-moulded handle for comfortable pumping – Adds alloy valve bezel – Locking handle for convenient transportation
	Charger	– Taller profile for quick, easy inflation – Steel base – Large stable steel base with gauge on bottom – Ergonomic handle
Good	**reCharger**	– Plastic base – Steel barrel and shaft – New auto-select head instantly fits both Presta, Schrader and Dunlop valves – 2 inch (5mm) gauge is easy to read – Includes ball and accessory attachments

434463

Bontrager Mini Charger

- High-volume frame-mount pump
- A stable, folding foot for pumping ease
- The long hose gives versatility and saves your valve stems

Part #	Model	Colour	Case
434463	Mini Charger	Black	10

514218

Bontrager Air Support HP/HV

- A durable, high-quality versatile pump with high-volume and high-pressure settings
- Stem-Saver provides stable base for easy inflation
- Inflate larger tyres to 60 psi (4 bar) with little effort
- Inflate to 125 psi (8 bar) with little effort
- The reversible valve head fits both Presta and Schrader valves
- The fold-out lever securely locks the pump head to the valve
- The mounting bracket fits easily under a bottle cage

Part #	Model	Colour	Case
514218	Air Support	Black	25

429234

Bontrager Air Support HP Pro S

- Premium-quality with a smaller volume chamber for higher pressure tyres
- Inflate to 120 psi (8.25 bar) with little effort
- Extendable, hidden hose reduces stress at valve when pumping at higher pressures
- Threaded head securely locks onto Presta valves
- Compact design fits snugly inside jersey pocket
- The mounting bracket fits easily under a bottle cage

Part #	Model	Colour	Case
429234	Air Support HP Pro S	Polished	25

429231

Bontrager Air Support HP L

- A durable, high-quality road pump with a smaller volume chamber for high-pressure tyres
- Inflate to 115 psi (8bar) with little effort
- The fold-out lever securely locks the pump head to the valve
- The longer version provides more air per stroke, the shorter fits snugly in jersey pockets
- The mounting bracket fits easily under a bottle cage
- Presta-only valve head

Part #	Model	Colour	Case
429231	Air Support HP L	Black/Silver	50

429232

Bontrager Air Support HP S

- A durable road pump with a smaller volume chamber for high-pressure tyres
- Inflate to 115 psi (8 bar) with little effort
- The fold-out lever securely locks the pump head to the valve
- The smaller size easily fits in jersey pocket
- The mounting bracket fits easily under a bottle cage
- Presta-only valve head

Part #	Model	Colour	Case
429232	Air Support HP S	Black/Silver	25

429235

Bontrager Air Support HV

- A durable, high-quality MTB pump with larger volume chamber for higher volume tyres
- Inflate larger tyres to 60 psi (4bar) with little effort
- The reversible valve head fits both Presta and Schrader valves
- The fold-out lever securely locks the pump head to the valve
- The mounting bracket fits easily under a bottle cage

Part #	Model	Colour	Case
429235	Air Support HV	Black/Silver	50

429236

429237

Bontrager Air Support

- Intended for low and mid-volume road tyres
- Inflates tyres to 80 psi (5.5bar) with little effort
- The auto-select head locks securely onto Presta or Schrader valves
- The fold-out lever securely locks the pump head to the valve
- Easy-to-read gauge
- The mounting bracket fits easily under a bottle cage

Part #	Model	Colour	Case
429236	Air Support	White	25
429237	Air Support Gauge	Black/Silver	25

Comparison chart
Mini pumps

	Name	Benefits
Best	**Air Support HP Pro**	**Upgrades from Air Support HP** – Replaces the lever-style head with a compact, thread-on head for Presta valves – Adds a hidden, pull-out hose
	Air Support HP/HV	**Upgrades from Air Support HP and Air Support HV** – Dual position allows high-pressure inflation and and high-volume inflation – The stem-saver supports the base during inflation
	Air Support HP	**Upgrades from Air Support HV** – Reduces barrel diameter to reduce efforts required of higher pressure tyres – Adds two lengths: long to improve stroke and short for compact storage
Better	**Air Support HV**	**Upgrades from Air Support G** – Adds a larger barrel for quicker inflation of larger tyres – Adds a reversible head for a tight fit on Presta and Schrader valves
	Air Support G	**Upgrades from Air Support** – Adds gauge for accurate inflation
Good	**Air Support**	– Auto-select head instantly fits both Presta and Schrader valves – Aluminium construction for light weight and durability – The flip-up aluminium lever holds the pump securely on the valve – Rebuildable for a longer life span – Includes a frame-mounting bracket

403783

Bontrager Shock Pump

- Dual-sided gauge for pinpoint accuracy
- On/off valve prevents bleed down
- Bleed valve reduces pressure in small increments
