|          |                       |                                                                                                                                                                                       |
|----------|-----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>A</b> | Seat tube             | The distance from the center of the bottom bracket to the top of the seat tube.                                                                                                       |
| <b>B</b> | Seat tube angle       | The angle of seat tube to the ground. Tailored to optimize power transmission on each frame size.                                                                                     |
| <b>C</b> | Head tube length      | The distance between the upper and lower headset. Affects how high your handlebar is relative to your saddle.                                                                         |
| <b>D</b> | Head angle            | The angle of head tube to the ground. Tailored to optimize steering precision on each frame size.                                                                                     |
| <b>E</b> | Effective top tube    | The horizontal measure from the center of the headset to the center of the seatpost. The most important measurement when buying a bike, because it cannot be changed.                 |
| <b>F</b> | Bottom bracket height | The vertical distance from the center of the bottom bracket to the ground. Expresses clearance of the frame over obstacles.                                                           |
| <b>G</b> | Bottom bracket drop   | The vertical distance the bottom bracket is below an imaginary horizontal line drawn through the axles. The greater the bottom bracket drop, the lower the rider's center of gravity. |
| <b>H</b> | Chainstay length      | The distance from the center of the bottom bracket to the center of the rear axle.                                                                                                    |
| <b>I</b> | Offset                | The perpendicular distance from the steering axis to the center of the front wheel.                                                                                                   |
| <b>J</b> | Trail                 | The distance the front wheel's contact patch lags behind the steering axis.                                                                                                           |
| <b>K</b> | Wheelbase             | The distance between the axles. Tailored to optimize weight distribution on each frame size.                                                                                          |
| <b>L</b> | Standover             | The vertical distance from the ground to the point on the top tube where you straddle the bike, measured 8.25" in front of seat tube.                                                 |
| <b>M</b> | Frame reach           | The horizontal distance from the bottom bracket center to the top of the head tube centerline.                                                                                        |
| <b>N</b> | Frame stack           | The vertical distance from the bottom bracket center to the top of the head tube centerline.                                                                                          |

**Notes**

All sizing and geometry specifications are calculated with a standard wheel size and fork axle to race. Larger volume tires as well as different fork lengths will change the dimensions in these charts.

|                                                                                                                                                        |      | Frame size* |        | A - Seat tube | B - Seat tube angle | C - Head tube length | D - Head angle | E - Effective top tube | G - Bottom bracket drop | H - Chainstay length | I - Offset | J - Trail | K - Wheelbase | L - Standover | M - Frame reach | Frame rise | Seat height maximum | Seat height minimum |

All dimensions are in centimeters unless otherwise stated.

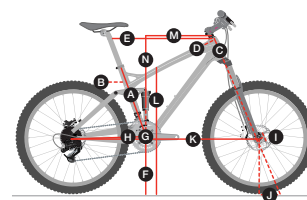

Not all sizes are available for all models.

Not all sizes are available in all markets.

\*Frame size represents fit. For seat tube length, see column A - Seat tube.

\*\*Refers to high or low setting on adjustable-geometry bikes.
